About Our Daughter

Our daughter grew up in different cities, which gave her a deep appreciation for people, cultures, and traditions. Having spent most of her childhood in Saudi Arabia, she values the warmth, modesty, and the sense of community it embodies.

She is cheerful, respectful, and deeply grounded in family values and deen. With a balance of modern understanding and traditional upbringing, she carries herself with humility and grace. Her professional journey combines her interests in biotechnology, artificial intelligence, and blockchain, a reflection of her curiosity and dedication to learning.

Her name is *Iqra*, meaning "to read," and true to its essence, she finds joy in seeking knowledge, reading, and exploring new ideas that help her grow in both faith and life.
