

number of

Governments say the children in a family can be controlled through taxes. It is necessary to control the population in a country for better future. According to me, it should be through taxes. It is the right of the government to control the population by following reasons. To start with the first, taxing is one of the most effective method to do so. While comparing India and China having somewhat close in terms of population it is seen that China has more control over population than India. Moreover, it is the duty of elected government to that country to the next level. This could be done

Only when the population is less otherwise most of the money will be used in good basic necessity like free food, electricity, water, etc. of the country. It is also necessity of the govt to maintain law and order in the country. When the population increases there will be poverty all around which leads to increase in crime rate.

There may be several reasons of but we should always think of common interest then it is possible to overcome such circumstances. It is seen that number of people's population is the manpower of the country but in modern world technology has got an advantage and ~~does not~~ required less manpower. All the developed country has less population. Some people say government cannot interfere in personal life of an individual but to seek the development of the country it is ~~very~~ necessary to take such step.

In my opinion, population of any country could be controlled by taxes i.e. more practical approach to avoid crime rates as well as for development of the country.
