

ESSAY :- Task 2

<< 30 Oct 2024 >>

40 minutes 250 words.

(Pg no - 24)

People say movies can be seen in our phones or tablets without going to the theater. This can ^{not only} save money ~~(as with~~ but also ~~the~~ ~~(the)~~ time taken for the travel. ~~A~~ ^a huge number of population) Today, most of the people are busy in their day-to-day chores and does not extra hours ~~to spend~~ specially to watch movies or online entertainment.

Many of them consider watching movies on cinema from their comfort zone i.e. sitting in their own home without going outside. Nowadays, people have easy access to all the upcoming or the latest cinema just in one click and ^{cheap} internet has made it (~~possible~~ ^{and flexibility}) even more easier. There is a sense of freedom ^{every individual} as ~~when~~ ^{you} ~~you~~ ^{people} have ~~your~~ ^{their own} phone or a tablet. If anyone has a mood to watch a cinema, they can have a good time and watch on their own pace.

There may be several reason many people believe film need to be seen in a cinema in order to be fully enjoyed but on the other hand the money spent for 2-3 hours of movies 'does not make any sense'. Infact they charge a 10 times more for the product purchase inside the theater.

In my opinion, the amount spent to watch a single movie in theater can be used to purchase ^{uses membership} ~~OTT platform~~ the monthly membership of OTT platform and people can use the membership to watch 100s of movies.

While comparing both the scenarios, people watching movies from their own comfort tends to enjoy equally (~~or more~~) than (~~watching it~~) going in a cinema.
