Summary

Front-End Developer with 4+ years of experience building scalable Angular and React applications. Skilled in developing responsive, high-performance web applications, integrating REST APIs, optimizing performance, and collaborating with cross-functional teams to deliver modern user experiences.

Technical Skills

Front-end: Angular, React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, SCSS

UI Libraries: PrimeNG, Material UI, Bootstrap, RxJS, Redux

Back-end: Node.js, Spring Boot (Basic), REST APIs

Database: MongoDB, MySQL, SQL

Cloud & DevOps: AWS (EC2), Git, GitHub, Bitbucket

Testing & Build Tools: Jest (Basic), Webpack, Vite, npm

Developer Tools: VS Code, Postman, Chrome DevTools, Redux DevTools

Concepts: Performance Optimization, Responsive Design, SEO, Agile/Scrum

Experience

Loyal Realty

Mar 2025 – Present

Web Developer

Dubai, UAE

- Designed, developed, and maintained the company's responsive website using WIX Studio, ensuring a modern, user-friendly interface aligned with brand guidelines.
- Integrated Wix CMS to support dynamic property listings, enabling content updates and streamlined property management workflows.
- Optimized site structure for SEO, including metadata, schema markup, and URL indexing, resulting in improved search engine visibility and organic traffic.
- Developed custom interactions, animations, and component layouts using Wix Studio's advanced design tools to enhance user engagement and site navigation.
- Performed regular site maintenance, troubleshooting, and performance monitoring to ensure high availability, fast load times, and cross-browser compatibility.
- Collaborated with marketing and sales teams to build landing pages, lead forms, and tracking integrations that supported digital campaigns and increased conversion rates.
- Utilized analytics tools (e.g., Wix Analytics, Google Analytics) to track user behavior and implement data-driven improvements to UX, accessibility, and site performance.
- Managed versioning, content updates, and publishing workflows to maintain a consistent, professional online presence.

Capgemini

Oct 2021 – Dec 2024

Senior Software Engineer

Navi Mumbai, Maharashtra, India

- Developed single-page applications (SPAs) using Angular, enhancing performance and user interaction.
- Collaborated with UX/UI designers to effectively translate design concepts into functional web applications, ensuring seamless user experiences and adherence to design specifications.
- Designed and implemented lazy loading for Angular modules to optimize application performance, resulting in faster initial load times and improved user experience.
- Collaborated with back-end developers to improve website functionality and integrate new features.
- Integrated RESTful APIs to connect front-end components with back-end services, optimizing data flow and application performance.
- Utilized Bitbucket for source code management, enabling seamless collaboration among team members and efficient handling of code merges and pull requests.
- Integrated PrimeNG components such as data tables, dropdowns, and charts to meet specific project requirements, improving functionality and user interaction.
- Designed and implemented robust form validation strategies using Angular's reactive forms, ensuring data integrity and providing real-time feedback to users.

- Analyzed application performance and implemented optimization techniques, leading to a 41% increase in load speed, while streamlining
- Successfully migrated the application from Angular 13 to Angular 17.

Projects

POS System (Full-Stack Application) | *React.js, Node.js, MongoDB*

- Built a full-stack POS system to manage sales, inventory, and billing workflows for real-time business operations.
- Implemented Role-Based Access Control (RBAC) to enhance user authentication and authorization.
- Designed interactive dashboards for monitoring business metrics, sales analytics, and reporting.
- Developed RESTful APIs to enable efficient communication between the frontend and backend.
- Deployed the application and managed end-to-end system functionality, ensuring reliable performance and scalability.

Penske Truck Leasing | *HTML5, SCSS, Typescript, Angular 13/17, PrimeNG, RxJS, Bitbucket, AdobeXD* Dec 2024

- Developed SPAs with Angular, improving performance and user engagement by 41% through lazy loading and application optimization.
- Collaborated with UX/UI designers for seamless user experiences and integrated PrimeNG components.
- Worked with back-end developers to enhance functionality via RESTful APIs.
- Enhanced load times through lazy loading of Angular modules.
- Managed source code using Bitbucket for efficient collaboration and implemented effective form validation with Angular’s reactive forms.

Shopping Cart System | *React, Spring Boot, Java, MongoDB, Eclipse, Microservices* Dec 2021

- The application utilizes a Spring Boot back end for RESTful API services and user management, while ReactJS provides a dynamic front-end interface for real-time shopping cart updates.
- The application features secure user authentication with Spring Security, dynamic shopping cart management via ReactJS, and a Spring Boot back end that handles inventory and checkout for a seamless shopping experience.

Certifications

- AWS Certified Cloud Practitioner
- Google Cloud Digital Leader
- Agile Software Development

Education

Pune University, India
*Bachelor of Engineering (Electronics & Telecommunication) **First Class***

Jul 2017 – Aug 2021

Additional Information

- Nationality: Indian.
- Currently based in Dubai with immediate availability.
- Open to Frontend and Full-Stack Developer roles.
- Continuously expanding skills in React.js, System Design, AI integration, Generative AI, and modern web technologies.
